-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8, 9 and 11-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claim 11, the word "means" is used in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function word preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

4. Regarding claims 8, 9 and 15-22, the word "means" is preceded by the word(s) "orifice", "nozzle", "chamber" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-5 and 8-23, as well as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Bingham (USPN 5,456,629). Bingham discloses a method for generating a high-velocity cutting jet 22 comprising the steps of forming a high-velocity jet of liquid 22, forming a suspension of an abrasive material 24 in a carrier condensable gas, entraining the suspension of abrasive material 24 into the liquid jet to produce a jet of mixture comprising abrasive material 24 and liquid and an apparatus 10 for generating a high-velocity cutting jet 22 comprising a pump 64 to form a high-velocity jet of liquid, an assembly 12 to form suspension of an abrasive material 24 in a carrier gas in form of vapor and to entrain the suspension into the jet of liquid to produce jet of mixture comprising abrasive material 24 and liquid 20, the assembly 12 having an elongate bore 77, (note Fig. 1-5, col. 3, lines 41-56, col. 4, lines 23-64, col. 7, line 23 to col. 8, line 59). Material used in an apparatus does not limit apparatus claim. See MPEP 2115.

Allowable Subject Matter

7. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yie, Chalmers and Bingham et al are cited to show related inventions.
